EiFL works in partnership with 47 library consortia in Albania, Armenia, Azerbaijan, Belarus, Bosnia & Herzegovina, Botswana, Cambodia, Cameroon, China, Egypt, Estonia, Ethiopia, Georgia, Ghana, Kenya, Kosovo, Kyrgyzstan, Laos, Latvia, Lesotho, Lithuania, Macedonia, Malawi, Maldives, Mali, Moldova, Mongolia, Mozambique, Nepal, Nigeria, Palestine, Poland, Russia, Senegal, Serbia, Slovenia, Sudan, Swaziland, Syria, Tajikistan, Tanzania, Thailand, Uganda, Ukraine, Uzbekistan, Zambia, Zimbabwe.

EiFL also runs projects in Algeria, Bulgaria, Chile, Colombia, Croatia, Czech Republic, Hungary, Kazakhstan, Mexico, Morocco, Romania, Slovakia, South Africa, Tunisia.
who we are

Established in 1999, EIFL is an international not-for-profit organization dedicated to enabling access to knowledge through libraries and library consortia in more than 60 developing and transition countries in Africa, Asia, Europe and Latin America.

THE CHALLENGE

Access to knowledge is fundamental to education and research, the improvement of lives, and the creation of human capital on which the development of societies depends.

Libraries play a key role by providing high-quality information resources and services to people. Yet factors such as the cost of commercial e-resources, legal barriers and poor technological infrastructure risk leaving many people around the world behind.

OUR APPROACH

Our unique approach is to partner with libraries organized in national library consortia – groups of libraries that share common goals – thereby reaching millions of people effectively.

OUR CORE INITIATIVES

- Access to Knowledge for Education, Learning and Research – ensuring well-resourced libraries, modern ICT infrastructure and skilled staff to provide essential support to students and scholars.
- Access to Knowledge for Sustainable Livelihoods – helping to transform people’s lives through innovative services in public libraries.

OUR ACTIVITIES

- We build capacity by organizing training events, developing tools and resources, providing up-to-date information on issues that affect access to knowledge.
- We advocate for access to knowledge nationally and internationally.
- We encourage knowledge sharing through peer-to-peer learning, best-practice case studies, our annual partner conference and cooperation between consortia.
- We incubate pilot projects for innovative library services.

OUR PROGRAMME AREAS

EIFL-Licensing
Negotiates affordable access to commercial e-resources, promotes awareness, and encourages usage.

EIFL-OA
Advocates for the adoption of open access (OA) policies and mandates, and builds capacity to launch and sustain OA repositories and journals.

EIFL-IP
Promotes national and international copyright law reform, and supports librarians to become advocates of fair access for all.

EIFL-FOSS
Encourages the use of free and open source software (FOSS) in libraries, and fosters a network of FOSS champions in our partner countries.

EIFL-PLIP
Enables and supports public libraries in the development of innovative ideas that use technology to improve people’s lives and livelihoods.
director's report

Working in close collaboration with our network of over 60 partner and project countries, we made excellent progress in extending access to knowledge in developing and transition countries during 2012. I would like to share some of the highlights.

The EIFL-OA programme is widely acknowledged to be at the forefront of the open access (OA) movement. We were a founding member of the original Budapest Open Access Initiative. Ten years on, we were delighted to celebrate a decade of progress at BOAI10, and to contribute to new recommendations. We were also honoured that Iryna Kuchma, EIFL-OA Programme Manager, was invited to join the PLOS (Public Library of Science) International Advisory Board and the DOAJ (Directory of Open Access Journals) Advisory Board.

Negotiating affordable access to commercial e-resources and encouraging usage are key aims of the EIFL-Licensing programme. In 2012, we saved an estimated US$215 million for libraries in our network, an increase of 23 per cent on 2011. The number of subscriptions grew by almost 50 per cent, and there were over 7 million full text downloads, an annual increase of 62 per cent.

In the global digital environment, it is more important than ever to have a legal framework that is consistent across borders. In 2012, following effective international advocacy by the EIFL-IP programme, over 55 member states of the World Intellectual Property Organization (WIPO) identified 11 topics for negotiation, and committed to work towards an international legal instrument for libraries and archives by 2014.

Through the EIFL-FOSS programme, we continue to increase awareness of free and open source software (FOSS), and to encourage implementations, through monthly webinars and by developing support materials – for example, a step-by-step guide to disability tools.

Through the EIFL-PLIP programme, we enable public libraries to offer modern innovative services to their communities. The impressive results of projects in 2012 provide additional evidence that ICT-enabled public libraries can improve people’s lives and livelihoods.

Supporting the development of library consortia, and helping them to become effective and sustainable, is central to our approach, and in 2012 we celebrated the tenth birthdays of three EIFL-partner consortia – the Kyrgyzstan Library Information Consortium (KLIC), the National Electronic Information Consortium (NEICON) in Russia, and the Zimbabwe University Libraries Consortium (ZULC).

Our team also organized and/or participated in over 80 events, webinars, workshops and conferences.

I would like to thank our partners and funders for supporting our work. Together we are improving access to knowledge and effecting real change in developing and transition countries.

Rima Kuprytė receiving the Hakob Meghapart Jubilee Medal for her personal and EIFL’s overall contribution to the development of the Armenian library system

RIMA KUPRYTĖ

WHO BENEFITED FROM EIFL SERVICES IN 2012?

>14 million people in 47 partner countries, and many millions more in 14 project countries

>2,300 universities, colleges and research institutions

>380 national and public libraries
Our key mission is to expand access to knowledge in developing and transition countries in a cost-effective and sustainable way.

To achieve this, we support the establishment and development of strong national library consortia.

Why?

Library consortia are groups of libraries that share common goals, and that can speak with one voice to policymakers and funders. They can also share resources and activities across their member libraries, thereby reaching millions of users efficiently.

Over the last 13 years, library consortia in 47 countries in Africa, Asia and Europe (representing more than 2,600 libraries) have joined the EIFL network.

All have benefited from our consortium management training and resources, and our consultancy and support services. We also facilitate communication across our network to ensure that knowledge and experience are shared.

Three EIFL-partner consortia celebrated 10 years of achievement in 2012.

**KYRGYZSTAN**

Over 70 libraries are now members of the Kyrgyzstan Library Information Consortium (KLIC) and, with the support of EIFL, the consortium has made significant progress in terms of increasing access to knowledge. There has been a dramatic increase in the number of computers available in libraries, the consortium now has access to resources from 12 vendors, and an ‘Open Repository of Kyrgyz Scientists’ and ‘Kyrgyzstan Book Memory’ digital archive have been established. The consortium has also been active in the training and development of librarians.

**RUSSIA**

The National Electronic Information Consortium (NEICON) was established in 2002 as a small organization with a mission to unite libraries, to lead them in their work with e-resources, to educate librarians, and to improve e-information literacy in Russia. Ten years later, NEICON has over 25 staff and 851 members, signs and executes about 2,500 licences for e-resources each year, executes contracts with the Ministry of Education and Science, conducts conferences, has developed a national e-resource platform, and runs training at venues across Russia.

**ZIMBABWE**

The Zimbabwe University Libraries Consortium (ZULC) has achieved a great deal over the last ten years. 12 universities are now members, and 6 colleges are associate members. Together, these institutions have access to over 50 scholarly databases, which include 15,000+ electronic journals and 50,000+ e-books. ZULC organizes at least eight training workshops each year, and it has also drawn up standards for university libraries in the country.

**NEICON** has been a member of EIFL from the very beginning of its activity. We have learned a lot and got a lot from EIFL programmes, projects and people. NEICON is now a well-developed consortium, widely recognized by Russian libraries, government and world publishers. However, we still look to EIFL for guidance, and the usefulness of such collaboration cannot be overestimated.

IRINA RAZUMOVA, Deputy Director for Research, NEICON

**ZULC members** have benefitted from support from EIFL in many areas – from e-resource licensing to copyright – and our consortium is stronger as a result. Being part of the EIFL network also enables us to share our knowledge and experience, and to learn from others.

KATHY MATSIKA, ZULC

Sania Battalova, Vice-President, KLIC
Sustainable access to high-quality information is essential for education, research and socio-economic development. But the high cost of many commercial e-resources is a major barrier to knowledge in developing and transition countries.

Through the EIFL-Licensing programme, we negotiate with vendors on behalf of partner countries in order to achieve free or highly discounted access, plus fair terms of use.

We also work closely with library consortia to promote awareness of available e-resources, and to encourage subscriptions and usage.

In 2012, we achieved estimated savings of over US$215 million for libraries in our network – an increase of 23 per cent on 2011 – and an average discount of more than 97 per cent.

The number of subscriptions to EIFL-licensed e-resources increased by almost 50 per cent to over 3,700. Full text downloads increased to more than 7 million, an annual increase of 62 per cent.

NEGOTIATING AFFORDABLE ACCESS TO KNOWLEDGE
Over 60 commercial e-resources from more than 25 publishers and aggregators are available to libraries in EIFL-partner countries – in many cases free of charge – as a result of our negotiations.

ACHIEVING SAVINGS AND EFFICIENCY GAINS
In 2012, our negotiations resulted in estimated savings for our library partners of over US$215 million, and average discounts of more than 97 per cent.

Our central negotiations and licensing work also results in significant efficiency gains across the network – for example, in terms of time and legal fees.

INCREASING AWARENESS, PARTICIPATION AND USAGE
Improving awareness of the e-resources available through the EIFL-Licensing programme, and encouraging usage, is vital to increasing access across our network of partner libraries.

We continued our effective programme of targeted and customized email campaigns throughout 2012. The number of subscriptions to EIFL-licensed resources increased by almost 50 per cent and full text downloads increased by 62 per cent to over 7 million in 2012.

HIGHLIGHTING BEST PRACTICE
Usage of commercial e-resources varies widely across the network. To highlight best practice and celebrate achievement, we announced two awards at the EIFL General Assembly in 2012.

• The Kenya Library and Information Services Consortium (KLISC) won the award (sponsored by JSTOR) for the best increase in usage of EIFL-licensed resources from 2010 to 2011, with an annual increase in downloads of over 13,000 per cent.

• The Consortium of Estonian Libraries Network (ELNET) won the award (sponsored by Burgundy Information Services) for the best sustained increase in usage of EIFL-licensed resources from 2007 to 2011.

Speed-dating with publishers, 2012 General Assembly

MARIKA MELTSAS, EIFL Country Coordinator for Estonia, collecting the award on behalf of ELNET
EIFL-Licensing: 2012 IN FIGURES

>7 million full text downloads – an annual increase of 62%

>US$215 million estimated savings – an increase of 23% on 2011

>97% average discount negotiated

>49% annual increase in number of subscriptions

>60 e-resources from more than 25 vendors

We have negotiated free or highly discounted access to over 60 commercial e-resources from more than 25 publishers and aggregators:

- BioOne
- Cambridge University Press
- ebrary
- EBSCO Publishing
- Emerald Group Publishing
- Encyclopaedia Britannica®
- Gale Cengage Learning
- International Monetary Fund (IMF) Publications
- IOP Publishing
- JSTOR
- Massachusetts Medical Society
- Multi-Science Publishing
- Nature Publishing Group
- OECD Publishing
- Oxford University Press
- Palgrave Macmillan
- Project MUSE
- Royal Society Publishing
- SAGE
- Taylor & Francis
- Wiley–Blackwell

E-resources on offer through the EIFL-Licensing programme include e-journal collections, full text and bibliographic databases, e-books and reference material.

See the full list at www.eifl.net/list-of-resources

The IMF’s relationship with EIFL (which began in 2012) has been instrumental in our program to get our eLibrary to developing economies. The IMF eLibrary provides vital economic information to researchers, students and government, and is offered free or highly discounted to EIFL members. EIFL promoted IMF availability and we reached more than 100 new subscribers in six months. 3

International Monetary Fund
removing barriers to knowledge sharing
the EIFL-OA programme

Open access (OA) is the immediate, online, free and unrestricted availability of peer-reviewed research literature.

The EIFL-OA programme advocates nationally and internationally for the adoption of OA policies and mandates.

Building capacity is another key focus. We educate researchers, students, research managers, librarians, publishers and policymakers about the changing scholarly communication landscape. We help to launch OA repositories and OA publishing initiatives, and to share research data and open educational resources.

In 2012, over 17,000 people in 10 countries were trained through our advocacy campaign grants. More than 33,000 people attended other training events organized by EIFL-partner consortia, and to share research data and open educational resources.

In 2012, over 17,000 people in 10 countries were trained through our advocacy campaign grants. More than 33,000 people attended other training events organized by EIFL-partner consortia, and to share research data and open educational resources.

INTERNATIONAL ADVOCACY

We continued to play a proactive role in international advocacy during 2012. For example:

- Ten years after taking part in the original Budapest Open Access Initiative, we contributed to new recommendations.
- With our partners, we implemented the EC-funded project OpenAIRE (OA Infrastructure for Research in Europe) and coordinated Eastern European activities in the OpenAIREplus project (2nd Generation of OA Infrastructure for Research in Europe).
- We co-hosted a workshop at the WSIS (World Summit on the Information Society) Forum.
- We contributed to an EC Report on e-infrastructures within Horizon 2020, and to UNESCO Recommendations on advancing OA in Eastern Europe.
- We were invited to join the DOAJ (Directory of Open Access Journals) Advisory Board, and the PLOS (Public Library of Science) International Advisory Group.

- Iryna Kuchma, EIFL-OA Programme Manager, co-authored a book, Implementing OA Mandates in Europe: OpenAIRE Study on the Development of OA.
- We played an active part in the sixth annual International OA Week, and activities took place in 30 EIFL-partner countries.

Advocacy project highlights include:

- Over 17,000 researchers, students, research administrators, policymakers, journal editors, publishers and librarians attended workshops and other outreach events organized by grantees in Belarus, Ghana, Kenya, Lithuania, Moldova, Nepal, Serbia, Sudan, Uganda and Zimbabwe.
- Students and young researchers in Kenya, Lithuania and Sudan are now major stakeholders in OA advocacy.
- The University of Nairobi adopted an OA policy.
- The Academy of Economic Studies became the first institution in Moldova to adopt an OA policy.
- 19 OA repositories have been set up in Kenya, Moldova, Nepal, Sudan, Uganda and Zimbabwe.
- Open Journal Systems were installed to support OA publishing initiatives in Belarus and Ghana.
- A national portal about OA was launched in Belarus.
- National OA Working Groups were set up in Belarus, Lithuania and Zimbabwe.

NATIONAL/INSTITUTIONAL ADVOCACY

Enabling partner countries to reach out to research communities through OA advocacy initiatives was a key focus in 2012, and we provided 11 small grants to support projects in 10 countries.

The results have been impressive, and case studies are available at www.eifl.net/eifl-oa-case-studies.
Engaging students and young researchers in the OA movement, and encouraging them to educate their peers, were an important focus in 2012. We awarded small grants to support OA advocacy initiatives in this area, and the achievements of our grantees have been impressive.

• In Kenya, the University of Nairobi adopted an OA policy as a result of a successful collaboration between the library and the Medical Students Association. There is also much greater and wider support for the institutional repository at Jomo Kenyatta University for Agriculture and Technology as a result of the advocacy efforts of ten students following OA training.

• Following effective training and advocacy, a national OA Working Group has been established in Lithuania. The Lithuanian Society of Young Researchers is one of the key stakeholders, and the Working Group’s goal is to implement OA recommendations for funding agencies and research institutions.

• Undergraduate students and young researchers in Sudan have become key stakeholders in the project OA Advocacy at Sudan Higher Education Institutions National Level (SudHENL). They have created a Facebook page, and also suggested innovative ways to raise awareness of OA among students, including drama and poetry-based activities.

We welcome the fact that, as a result of the project, young researchers have become knowledgeable and effective advocates for OA, and are now key stakeholders in the new national OA Working Group.

DR VILMA PETRIKAITĖ, President of Lithuanian Society of Young Researchers, Lithuania
Restrictive copyright laws create legal barriers to the access and use of resources for education, research and personal development.

Through the EIFL-IP programme, we advocate for a fair and balanced copyright system that supports libraries in developing and transition countries in maximizing access to knowledge in the digital environment.

We build capacity in copyright issues and advocacy in our partner consortia. We produce unique resources on topical issues which are translated into many languages. We also play a leadership role in promoting national and international copyright law reform.

In 2012, our effective advocacy has led to continued progress in ensuring library copyright issues are on the agenda at the international level.

To support advocacy for national copyright reform, we awarded grants in eight countries. Moldovan and Polish versions of our highly regarded online open curriculum, Copyright for Librarians, are now available, and we also published a new open access handbook based on the course.

**INTERNATIONAL ADVOCACY**

In the global digital environment, it is more important than ever to have a legal framework that is consistent across borders. Through intensive international advocacy initiatives, we have made significant progress towards achieving this goal.

In 2012, over 55 member states of the World Intellectual Property Organization (WIPO) identified 11 topics for negotiation – including each topic we presented with our partners in 2011 – and committed to work towards an international legal instrument for libraries and archives by 2014.

We also contributed to global civil society campaigns and responded to public consultations, such as the UNESCO Vancouver Declaration on digital preservation.

**NATIONAL ADVOCACY**

To support advocacy for national copyright law reform, we awarded grants for campaigns in Armenia, Estonia, Latvia, Mongolia, Poland, Senegal, Uganda and Uzbekistan. Results from the first completed projects in Armenia and Poland indicate that libraries have emerged as a strong force, engaging for the first time in the legislative process and bringing important public interest considerations to the debate.

We encourage our partner consortia to adopt formal positions on copyright. The Consortium of Uganda University Libraries led the way in 2012 by adopting a Statement of Principles on Copyright.

**DEVELOPING TOOLS AND RESOURCES FOR LIBRARIANS**

The EIFL Handbook on Copyright and Related Issues for Libraries was localized for Armenian law, by a team led by Hasmik Galstyan, EIFL-IP Coordinator.

Our online open curriculum Copyright for Librarians (developed in association with Harvard’s Berkman Center for Internet and Society) was accessed more than 4,500 times on Open Educational Resource (OER) platforms.

Moldovan/Romanian and Polish versions of the curriculum were launched (see EIFL-IP in action section).

We also transformed the curriculum into a practical handbook, which is available as a free download and via print on demand.

**CAPACITY BUILDING**

Librarians in 35 EIFL-partner countries have become experts in copyright policy and law as a result of our advocacy and training initiatives.

This increasingly skilled and powerful network is at the heart of what we do. Working together, we can effect real change.

For example, in 2012:

- Over 6,000 people attended locally organized training or information sessions on copyright.
A key aim of the EIFL-IP programme is to ensure that the next generation of librarians and lawyers understands why improving national copyright law benefits the public interest, and how to advocate for change. We therefore produce a wide range of training materials which we also encourage our network to translate and adapt to suit local legal environments.

Following innovative partnerships which are already being replicated in other EIFL-partner countries, we welcomed the launch of two new versions of our online open curriculum Copyright for Librarians (CFL) in 2012.

In Moldova, the EIFL-IP team worked with language students from Moldova State University to translate CFL into Romanian. The curriculum now forms part of the University’s Bachelor’s degree and Masters programmes in Library and Information Science.

The innovative Polish adaptation of CFL, including new features such as ‘fun facts’ and videos, resulted from a collaboration between law students at Nicolaus Copernicus University (UNC) and the University of Białystok.

The course is publicly available online, it has been integrated into UNC’s Moodle-based e-learning system, and an app for smart phones and tablets is planned.

**EIFL-IP: 2012 IN FIGURES**

| >6,000 | people trained in EIFL-partner countries |
| >4,500 | views of Copyright for Librarians online curriculum on OER platforms |
| >55   | WIPO member states now committed to working towards an international legal instrument for libraries and archives by 2014 |
| 8     | national advocacy campaigns supported |
| 2     | translations (Moldovan/Romanian and Polish) of Copyright for Librarians online curriculum (7 in total) |
| 1     | Armenian version of EIFL Handbook on Copyright and Related Issues for Librarians (7 in total) |

**EIFL-IP in action**

**EFFECTING LONG-TERM CHANGE THROUGH COLLABORATION**

We are delighted that library students in Moldova can learn about the importance of copyright law for library activities, and also that our language students gained invaluable experience in specialist translation work in the process.

NELLY TURCAN, Vice Dean, Faculty of Journalism and Scientific Communication, Moldova State University

Language students at Moldova State University presented with certificates by Vice Dean, NELLY TURCAN (far right), and MARIANA HARJEVSCHI, EIFL-IP Coordinator (far left)

I began my copyright journey with EIFL in 2005. I have since taken a Master’s degree in international law, and look forward to using my new knowledge to increase access to information in Albania.

ALEKSANDRA XHAMO, EIFL-IP Coordinator, Albania

improving ICT infrastructure in libraries
the EIFL-FOSS programme

Licence fees for commercial software applications are a significant barrier to the development of modern ICT infrastructure in many countries. There are now free and open source software (FOSS) tools to support almost all library functions. However, libraries are often not aware of what is available, and staff may lack the skills required for successful installation and maintenance.

Through the EIFL-FOSS programme, we support the deployment of free and open source software and provide the training, and support for advocacy, required to enable libraries to develop a modern and sustainable ICT infrastructure.

In 2012, we prepared step-by-step implementation guides for two key tools, and developed social networking sites to establish communities of practice. We funded two translation and implementation projects for SubjectsPlus, a FOSS tool designed to increase discoverability and use of e-resources. To establish communities of practice around these tools, we also created social networking sites. The sites promote cross-fertilization of ideas and sharing of knowledge, and also encourage implementation of FOSS tools at local and national levels.

Detailed information on over 30 FOSS tools is now available on our website, including case studies of implementation in our partner countries and links to additional information (see www.eifl.net/foss-tools). Our A–Z glossary of FOSS solutions for libraries has also been expanded and updated.

Participants at a three-day national FOSS workshop in Uganda

In 2012, we ran 13 webinars, which enabled us to reach over 240 people from 46 countries cost-effectively. Recordings of the sessions have also been viewed over 300 times. The webinars covered a wide range of useful FOSS applications, and included presentations from internationally renowned experts plus illustrative case studies from our network and beyond.

We prepared detailed step-by-step implementation guides for SubjectsPlus and a range of accessibility/disability tools, all of which are designed to increase the discoverability and use of e-resources. To establish communities of practice around these tools, we also created social networking sites. The sites promote cross-fertilization of ideas and sharing of knowledge, and also encourage implementation of FOSS tools at local and national levels.

Detailed information on over 30 FOSS tools is now available on our website, including case studies of implementation in our partner countries and links to additional information (see www.eifl.net/foss-tools). Our A–Z glossary of FOSS solutions for libraries has also been expanded and updated.

Participants at a three-day national FOSS workshop in Uganda

Significant progress was made in Africa during 2012 as a result of the regional training seminar we ran in Tanzania at the end of 2011. We surveyed delegates six months after the event, and over 70 per cent of respondents had run workshops in their countries on specific FOSS tools, and national FOSS workshops had taken place in five countries, including a three-day Koha workshop in Uganda. In addition, there have already been over 50 implementations of FOSS tools in participants’ libraries, and funding has been obtained for further FOSS projects.

KNOWLEDGE SHARING AND AWARENESS RAISING

Building awareness and understanding about developments in FOSS is an important focus of our work.

In addition, there have already been over 50 implementations of FOSS tools in participants’ libraries, and funding has been obtained for further FOSS projects.
SUPPORTING IMPLEMENTATIONS

To encourage more deployments of SubjectsPlus, and thereby to increase the discoverability of e-resources, we provided small grants in 2012 to two libraries in Cambodia and Kyrgyzstan.

They translated the software for the first time into Khmer and Russian, and these versions are now available to other libraries. In addition, details about the implementation (including lessons learned from the translation process), benefits and impact will be shared widely through case studies that serve to encourage, inform and support others.

The project teams also had an opportunity to engage with the wider FOSS community, and to contribute to the development of the software and documentation.

Our popular monthly webinars continue to be a highly cost-effective way to increase awareness and knowledge of FOSS tools across our network, and to encourage implementations.

Over 600 people from more than 70 countries have attended EIFL-FOSS webinars since we introduced them in 2011, and recordings of the 24 sessions have been viewed over 780 times.

A survey of participants revealed that:

- 73 per cent of respondents had never heard of the tool being presented, or knew little about it, before attending the webinars or viewing the recordings.
- 39 per cent of respondents viewed recordings of sessions that they had attended.
- 61 per cent of respondents viewed recordings of webinars that they had not attended.

WEBINARS CREATE A BUZZ ABOUT FOSS IN LIBRARIES

The webinars I attended were of great value. I learned and shared the output with my colleagues.

Mandy Taha, Senior Librarian, Library of Alexandria, Egypt

This is a very fast and easy way to learn. More of such webinars should take place next year.

Richard Bruce Lamptey, IR Librarian, KNUST, Ghana

The webinars are a terrific move in promoting open source. I have met many who have praised them.

Edmund Balnaves, Information Coordinator, IFLA IT Section

The webinars I attended were of great value. I learned and shared the output with my colleagues.

Mandy Taha, Senior Librarian, Library of Alexandria, Egypt

This is a very fast and easy way to learn. More of such webinars should take place next year.

Richard Bruce Lamptey, IR Librarian, KNUST, Ghana

The webinars are a terrific move in promoting open source. I have met many who have praised them.

Edmund Balnaves, Information Coordinator, IFLA IT Section

Richard Bruce Lamptey, IR Librarian, KNUST, Ghana

The webinars are a terrific move in promoting open source. I have met many who have praised them.

Edmund Balnaves, Information Coordinator, IFLA IT Section
Access to information powers the socio-economic development of local communities. Public libraries in developing and transition countries are uniquely placed to offer this vital service. Yet, in most cases, they lack resources and technology to do so.

Through the EIFL-PLIP programme, we are stimulating change by enabling public libraries to develop innovative services using ICT to improve people’s lives and livelihoods. Since the programme launched in 2009, we have supported 39 projects through which over 10,000 people in 23 countries gained new skills and information that directly benefit their health, welfare and job prospects.

In 2012, 14 grantee libraries introduced new services and evaluated impact. We also funded 13 new services in Africa, and launched a series of Innovation Awards.

As a founding member of the Beyond Access initiative, we continue to play an active role in advocating for the importance of public libraries to socio-economic development, and we have also supported advocacy efforts in Ghana, Kenya and Uganda.

**SUPPORTING INNOVATION FOR COMMUNITY DEVELOPMENT**

From remote farming communities to vulnerable young people, the impressive results of 14 EIFL-PLIP projects in 2012 clearly demonstrate that ICT-enabled public libraries can have a major impact on lives and livelihoods. For example:

**SOUTH AFRICA** Masiphumelele Public Library near Cape Town helped over 20 vulnerable young people find jobs and more than 30 to enter further education.

**KAZAKHSTAN** East Kazakhstan Oblast Pushkin Library’s new ICT service in a yurt helped 55 young people find work, start businesses or improve their jobs.

**MACEDONIA** Regional public and university library Goce Delcev-Stip’s mobile information service for farmers contributed to a 20 per cent increase in the number of farmers applying for agricultural production subsidies.

Read impact assessments for all EIFL-PLIP projects at [www.eifl.net/plip-impact](http://www.eifl.net/plip-impact)

"The library has changed my life because I am learning and I will get a certificate instead of just sitting at home doing nothing."  

SIKHUMBUZI TSIBO, young ICT trainee

"Here, under the round dome of the yurt, young people share experiences and look for solutions to life’s daily problems like our ancestors did."

BIBIGUL SHAGYIEVA, Deputy Director, East Kazakhstan Oblast Pushkin Library
ACHIEVEMENTS IN COMMUNITY DEVELOPMENT

We launched a series of Innovation Awards to celebrate and communicate the impact of innovative ICT-enabled services offered by public and community libraries without EIFL-PLIP support. The following winners were selected from 97 applications in three categories:

**Economic Wellbeing**

**CHILE** Public Library No. 56 ‘El Bollenar’: ICT training and new skill-sharing workshop for women.

**NEPAL** Agyauli Community Library and Resource Centre: ICT training and new information service for farmers.

**SERBIA** Belgrade City Library: financial literacy training and online service for young people, families and seniors.

**UGANDA** Kawempe Youth Centre: ICT and financial literacy training for vulnerable young people.

**Community Health**

**ROMANIA** ‘Gh. Asachi’ County Library Iași: first aid training service and online toolkit.

**UGANDA** Hoima Public Library: health service including ICT training to combat malaria.

**Social Inclusion**

**CROATIA** Public Library ‘Fran Galovic’: ICT support for the Roma community.

**COLOMBIA** Biblioteca Pública ‘Fernando Gómez Martinez’: ICT training for people with disability.

**POLAND** Twardogóra Public Library: ICT training for seniors.

**UGANDA** Kitengesa Community Library: services for deaf children including ICT training.

**UKRAINE** Luhansk Region Universal Scientific Library ‘M. Gorky’: mobile ICT school for people with disability.

An innovative initiative by Zagreb City Libraries has helped 22 homeless people find full-time, part-time or temporary jobs.

With support from the EIFL-PLIP programme, the library installed four computers and a printer in Zagreb’s biggest homeless shelter, and established an ICT training programme designed to improve job prospects.

In just one year, the library...

- Trained 65 people in ICT skills – more than 15 per cent of all registered homeless in Zagreb – and helped 22 people to find jobs.
- Trained 10 volunteers to provide ICT and job-seeking training for the homeless.
- Organized a conference on homelessness, bringing together local authorities, social workers, psychologists, shelter managers, volunteers and librarians.
- Created a website where the homeless can publish stories and articles, which has attracted over 8,200 visitors.
- Encouraged a second homeless shelter to introduce ICT training for job seekers.

‘We were positively surprised to see a cultural institution – the library – showing such sensitivity and ability in improving the lives of homeless people!’

ROMANA GALIĆ, City of Zagreb Office of Social Protection and Persons with Disabilities

‘The greatest success of this programme is that we have seen improvements in the self-confidence of our clients. Most homeless people are stigmatized, which negatively influences their self-confidence and blocks their progress.’

DANIJELA VIDIC, social worker, Kosnica shelter

The General Assembly is our major annual knowledge-sharing event. Coordinators from our partner countries come together for three intensive days to discuss EIFL activities, and to debate state-of-the-art issues with international experts and publisher partners.

Our 2012 General Assembly was hosted by the American University of Armenia in Yerevan, and was attended by 71 participants from 43 countries, and 13 publisher partners.

The theme of the GA was ‘From Gutenberg to the Internet – A New Renaissance for Libraries’.

Presentations reflected the transition from print to digital content, and explored challenges and new opportunities for libraries. Interactive sessions included open access book publishing, advocacy for consortia, and issues to consider when adopting e-books and undertaking digitization projects.

Yerevan was the UNESCO World Book Capital in 2012, and we were honoured that the EIFL General Assembly (GA) was part of the official programme of celebrations and that Ms Hasmik Poghosyan, Minister of Culture of Armenia, gave a welcome speech on the role of libraries in today’s society.

We are grateful to the Armenian Ministry of Culture for their financial contribution towards the 2012 GA, and Tigran Zargaryan (Director of the National Library of Armenia, EIFL Country Coordinator and EIFL Advisory Board member) for making this possible.

‘We were proud to host the GA because, in addition to the rich professional experience it offers, we had the privilege of introducing the EIFL community to the culture, history, tradition and soul of Armenia, one of the ancient civilizations of the world.’

Tigran Zargaryan, Director, National Library of Armenia (below)

LEARNING AND SHARING

The 2012 GA programme included a wide range of presentations and interactive sessions, in addition to opportunities for informal knowledge sharing. Speakers from within the EIFL network shared best practices and successes, and guest speakers shared their expertise on a variety of topics. For example:

- Michael W. Carroll (Professor of Law, American University Washington College of Law) gave the keynote speech on the promise of open access for development.
- Ronald Snijder (Project Manager Digital Publications, OAPEN Foundation) gave a presentation on a new platform for OA books in the humanities and social sciences.
- Arnold Hirshon (Associate Provost and University Librarian, Case Western Reserve University) provided an overview of the e-book landscape.
- Presentations from EIFL Coordinators covered a wide variety of topics – from effective consortial and open access advocacy strategies, to the benefits of academic and public libraries working together within consortia.
‘SPEED-DATING’

A popular feature of the GA is ‘speed-dating’. Participants spend 15 minutes with each publisher, and EIFL Programme Managers, to learn about new developments, discuss any problems or simply catch up.

‘The thing that impressed me most about the EIFL GA was how well the group works together given the vast differences in local situations, the ability to focus on common issues and the sharing of experiences – it really highlights the value of networks.’

MICHAEL W. CARROLL, Professor of Law, American University Washington College of Law (above)

‘The EIFL GA is always a great conference to attend as you get the chance to meet and talk with representatives from over 40 countries! It’s one of those events that you really shouldn’t miss.’

MARcin KWiatKowski, Regional Sales Manager, SAGE Publications (below left)

The GA has been immensely useful for me and by extension for all my colleagues, because I intend to share widely the knowledge I have gained when I am back home.

MESFIN ABERA, Chairperson, Consortium of Ethiopian Academic and Research Libraries (above)

‘Why have I never been to a GA before? I should have come much earlier to benefit from all the knowledge we are learning and sharing.’

ISAAC SAFARI, Executive Secretary, Consortium for Tanzania Universities and Research Libraries

‘The GA is a wonderful mixture of the highly professional and the very friendly – a great environment for international cooperation.’

RUSUDAN ASATIANI, Leading Specialist, National Parliamentary Library of Georgia
